Airport Consulting & Project Management

COMPLEXITY MADE EASY

ABOUT

LOGO InfraConsult is a specialized consulting and project management company with a proven track record in managing complex building, operational, and infrastructure projects with a particular focus on the airport industry.

What sets us apart is our commitment to clear and comprehensive requirements definition throughout all project phases. In close collaboration with our clients, we develop customized solutions that place their specific needs at the core of our work. With deep expertise in airport operations and project management, we ensure smooth implementation of solutions that meet the unique demands of the airport industry.

Our airport consulting services include:

- ✈ Requirements Management
- ✈ Capacity Analysis
- ✈ Process Analysis and Optimization
- ✈ Construction Project Management
- ✈ Operational Implementation Management
- ✈ Commissioning Support and ORAT
- ✈ Terminal Operations Support
- ✈ Safety Assessments, Airport Certification and Compliance

OUR EXPERTS

include civil engineers, architects, and industrial engineers with hands-on experience in large-scale airport projects. We work closely with our clients – honestly, pragmatically, and always on equal footing. Our certified project managers and flexible partner network allow us to assemble the right team for each project.

OUR SERVICES

At LOGO InfraConsult, we help airport operators and aviation industry partners achieve better performance through tailored, end-to-end consulting and project management services.

REQUIREMENTS MANAGEMENT

We define and manage requirements in a structured and systematic way, ensuring our clients' needs and goals are met using state-of-the-art requirements management software.

CAPACITY ANALYSIS

We analyze existing capacities across all airport areas, identify bottlenecks, and define future infrastructure requirements to meet the demands of both passengers and airlines.

PROCESS ANALYSIS and OPTIMIZATION

We leverage state-of-the-art tools and proven operational methods in customized process analysis and optimization services to boost efficiency, reduce costs, and elevate the overall airport experience. We also develop high-performance operational concepts for passenger and staff flows, including fully integrated processes for passengers with reduced mobility (PRM).

CONSTRUCTION PROJECT MANAGEMENT and OPERATIONAL IMPLEMENTATION MANAGEMENT

Our team coordinates complex airport construction projects, ensuring delivery on time and within budget while maintaining regulatory compliance, operational stability, and safety standards.

We also specialize in managing construction works during ongoing operations by aligning construction, operations, and users to minimize operational impacts and ensure safe, uninterrupted airport processes.

COMMISSIONING SUPPORT and ORAT

After completion of construction or refurbishment projects, we actively support our clients in commissioning new infrastructure or facilities, from developing operational concepts to staff training and ensuring seamless integration with existing infrastructure and operations.

TERMINAL OPERATIONS SUPPORT

We provide direct support for daily terminal operations, helping management optimize processes, develop Standard Operating Procedures (SOPs), and improve performance through Key Performance Indicator (KPI) tracking and continuous improvement initiatives. Our services include passenger flow optimization, resource planning, staff training, and contingency planning to ensure effective and efficient terminal operations.

SAFETY ASSESSMENTS, AIRPORT CERTIFICATION and COMPLIANCE

We offer strategic and operational guidance to airports on risk management, safety assessments, certification and compliance processes, ensuring they meet regulatory standards.
